## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of Species II claims 32-51 and 58-78 in the reply filed on 11/3/04 is acknowledged.

### *Specification*

The disclosure is objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner requires the Applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o) to explicitly state, with reference to the terms and phrases of the claim element, what structure, materials, and acts perform the function recited in the claim element. Please note that the MPEP clearly states, "Even if the disclosure implicitly sets forth the structure, materials, or acts corresponding to the means-(or step-) plus-function claim element in compliance with 35 U.S.C. 112, first and second paragraphs, the PTO may still require the applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o)...". (Also see **MPEP 2181** (Rev. 1, Feb.2000))

Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 37-39 and 66-68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claims 37 and 66-68, the claim does not further limit the independent claim because applicant has never claimed a medical article. Applicant only claims a retainer for use with a medical article.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32-51 and 58-78 are rejected under 35 U.S.C. 102(b) as being anticipated by Swauger U.S. Pat. No. 5,413,562.

Swauger discloses a retainer comprising: a body member comprising (10); a channel (50) formed through the body member and having a longitudinal access (50) opening disposed on an underside of the body member to allow at least ingress of the medical article into the channel, at least one abutment extending generally normal to an axis of the inverted channel (44); at least one support (lower wall portion of 50 shown in fig. 4) disposed on the underside of the retainer and to a side of the access opening opposite the channel axis; as to claims 33-35, 40-41 (figs. 2, 6A and B);

Art Unit: 3763

as to claim 36, (figs. 3 and 5); as to claim 37, (fig. 2); as to claims 38-39, (figs. 1-6B); as to claims 42-43, (figs. 1-4); as to claims 44-51 and 58-78, (see above rejections).
